# How Do I Get My Money Back From Coinbase Wallet?Help with Coinbase? Click Here

Getting money back from Coinbase **1-(855)(618)(8437)**  Wallet depends heavily on how the wallet works and the type of transaction involved. Coinbase Wallet is a self-custody wallet contact@coinbase.com, which means you control your private keys and **1-(855)(618)(8437)** Coinbase does not hold or manage your funds on your behalf. Because of this structure, transactions made from  **1-(855)(618)(8437)** Coinbase Wallet are generally irreversible once they are confirmed on the blockchain. If you sent **1-(855)(618)(8437)** cryptocurrency to the wrong address, wrong network, or a scam address, recovering the funds is usually not possible.

If your funds appear missing, the **1-(855)(618)(8437)**  first step is to check the transaction status directly within the wallet or on a blockchain explorer. Sometimes transactions are delayed due to network congestion  **1-(855)(618)(8437)** or pending confirmations, which can  **1-(855)(618)(8437)** make it seem like funds are lost when they are actually still processing. Ensuring that the correct network **1-(855)(618)(8437)** was used is also important, **1-(855)(618)(8437)** as sending assets on the wrong blockchain can cause them not to appear in the receiving wallet.

In cases where funds are stuck **1-(855)(618)(8437)** due to app issues, syncing problems, or display errors, updating the Coinbase Wallet **1-(855)(618)(8437)**  app or refreshing the wallet  **1-(855)(618)(8437)** can help. Restoring the wallet using your recovery phrase on the same or a new device may also **1-(855)(618)(8437)** resolve balance display issues.  **1-(855)(618)(8437)**This recovery phrase is the most critical element of the wallet, as it is the only way to restore access to your assets if something goes wrong.

If the issue involves interaction **1-(855)(618)(8437)**  with a decentralized application or smart contracthttps://www.coinbase.com/, recovery depends on the specific protocol used. **1-(855)(618)(8437)**  Coinbase Wallet support can provide guidance on technical steps, but they cannot reverse transactions or  **1-(855)(618)(8437)** access your funds. This is why users are strongly advised to double-check addresses, networks, **1-(855)(618)(8437)** and permissions before sending  **1-(855)(618)(8437)** assets. In self-custody wallets, responsibility for fund safety ultimately lies with the user.
