### What is Xanax?

Alprazolam, commonly known as Xanax, is a powerful prescription medication used to treat anxiety disorders and panic attacks. It belongs to the benzodiazepine class of drugs, which work by enhancing the activity of gamma-aminobutyric acid (GABA) in the brain. GABA is a

neurotransmitter that helps calm down excessive nerve activity, promoting a sense of relaxation and reducing feelings of anxiety.

### **Dosage Forms:**

Xanax is available in various dosages, including:

- 0.25mg
- 0.5mg
- 1mg
- 2mg

The medication is usually taken orally, once or twice a day, depending on the individual's needs and response to the treatment.
