## What is Dilaudid?

Dilaudid is the brand name for hydromorphone, an opioid analgesic prescribed for moderate to severe pain. It works by interacting with the central nervous system to alter the perception of pain, offering quick and effective relief.

### **Key Uses of Dilaudid:**

- Post-surgical pain management
- Severe chronic pain conditions
- Pain associated with injuries or acute medical conditions

Because Dilaudid is a potent opioid, it is essential to use it strictly under medical supervision. Misuse or overuse can lead to serious side effects, dependency, or overdose.
