What Is Farmapram?

Farmapram, also known by its generic name **Bromazepam**, is a potent benzodiazepine used to treat **various anxiety disorders**. Since its introduction in the 1970s, it has become a trusted option for managing acute stress, chronic anxiety, and sleep disturbances.

Farmapram is commonly prescribed for:

- Generalized Anxiety Disorder (GAD)
- Panic Disorder
- Social Anxiety Disorder (SAD)
- Acute Stress Reactions
- Insomnia and Sleep Difficulties

It works by **enhancing GABA activity** in the brain, a natural calming neurotransmitter, helping reduce worry, tension, and restlessness.

★ Key Insight: Farmapram acts quickly, typically providing relief within 30–60 minutes of ingestion.
