What Is Dilaudid?

Dilaudid, also known as **hydromorphone**, is a potent semi-synthetic opioid prescribed for **severe, acute, or chronic pain** that may not respond adequately to other medications. It works by binding to opioid receptors in the brain, reducing pain signals, and providing relief.

Dilaudid is available in multiple forms:

- Immediate-release oral tablets
- Extended-release oral capsules

- Injectable solutions

 **Key Insight:** While highly effective, Dilaudid carries risks of dependence and overdose if not used responsibly. Always follow your healthcare provider's guidance.
